### Symposia on

## SUSTAINABILITY EDUCATION

Dear Madam/Sir,

Education is fundamental to development and growth. Sustainable development is about making sure that all people can enjoy their lives fully in the present as well as in the future. It refers to sustainable society in terms of social, economic, political, and cultural aspects of people's well-being. Sustainability Education is an exciting field that blends a range of pedagogical techniques to promote an understanding of the connections among the environment, the economy and society. Education is a human right; it is the key to freedom; and it is the route to development. To educate is to give people the keys to the world, which are independence and love; granting them the ability to walk alone, at the happy pace which is that of natural and free individuals.

With an intention to build cross disciplinary collaboration in Education, School of Pedagogical Sciences is organizing Symposia on a variety of themes insinuated by NAAC from 24th January, 2023 Tuesday onwards

All are cordially invited

Regards,

**Prof. (Dr.) Asha J.V**
