Dear Sir/Madam,
Hope doing well.

Online proposals are invited for consideration of support under the Scheme "Promotion of University Research and Scientific Excellence" (PURSE), by DST, Government of India.
The primary aim of the scheme is to offer assistance in reinforcing the research and development (R&D) foundation of universities across the country.

Nature of Support: The main objective of the scheme is to strengthen the research capacity of Indian Universities and provide support for nurturing the research ecosystem and strengthening the R&D base of the Universities in the country.

The Scheme will provide the support to acquire research facilities (support for acquiring the teaching facilities will not be provided in the scheme), research man-power cost, acquiring research consumables, funds for travel, organizing workshops and conferences, contingencies and maintenance of the facilities.

Universities are encouraged to consolidate their areas of expertise into interdisciplinary thematic endeavors, forming accomplished teams with clearly defined objectives.

It is advised that universities identify excellence within specific departments through a defined process and allocate a significant portion of the program's support to these high-performance groups, rather than uniformly distributing funds among performing and non-performing departments or groups.

Universities are urged to submit consolidated proposals that ensure broad participation from Science and Engineering departments within the university.

Scheme does not allow any provision for building/construction and recruitment of staff in permanent in nature. The Manpower recruited under PURSE shall be co terminus with the project duration.

The manpower shall be technical and scientific only. Individual Centric R&D proposal shall not be entertained under this scheme. The synergy and focus of research may preferably be aligned to National Missions/priorities.

Duration: The duration of support for each PURSE Project will be for a period of 4 years.

Proposals are invited in three Categories:

The quantum of support and minimum eligibility conditions is organized into three categories as given below. The broad objective in each case is to support potentially high impact, interdisciplinary research (both basic and applied) aligned to national priorities and missions. The research should also align well with goals of Self-Reliant India (Atma Nirbhar Bharat) and Start-up India etc. Where possible, the proposed research should also be geared towards increased national competencies in fields like manufacturing, waste processing, clean energy and water and other similar national priorities.

- Category A- Maximum Support INR 30 Crore
- Category B- Maximum Support INR 20 Crore
- Category C- Maximum Support INR 15 Crore

We can assist in the application process.
Request for WhatsApp call.
My WhatsApp number, +91-8097578752

Warm Regards,
Ranen
